

# Welcome to Gothenburg

10-11 November 2015 for the

## MONALISA 2.0 Final Conference

*How will the maritime industry  
become safer, efficient and  
more environmentally friendly?*

The MONALISA 2.0 project will demonstrate and share the results of two years of labour during a busy day and a half in Gothenburg.

Welcome to Lindholmens Conference Center  
in Gothenburg

# ***How will the maritime industry become safer, efficient and more environmentally friendly?***

The MONALISA 2.0 project will demonstrate and share the results of two years of labour during a busy day and a half in Gothenburg. Live demos of Sea Traffic Management services, indoor positioning system, lifeboat launch and retrieval technology and more will bring the ideas and solutions to life.

Starting at 13.00 November 10 and finishing at 15.00 on November 11, you will experience an efficient use of your time, with interesting subjects, discussions and generous time for networking. We believe that it is the breaks that perhaps will bring you the most value, through informal meetings with the right people.

Program and more information will be published on our website [www.monalisaproject.eu](http://www.monalisaproject.eu)

For pre-registration, drop an e-mail to [manuela.endrich@sjofartsverket.se](mailto:manuela.endrich@sjofartsverket.se)
