- ☐ Cajsa is
- ☐ Canaris Almeria

3. To share the route that you are monitoring, i.e. then the route you are monitoring will automatically be shared (with the Winter Navigation Service (WNS) in this case)

4. Click "Share"

5. Then click in the box left of where it says "Monitored Route", there will then be a "tick-mark" there.

6. Now the service (WNS in this case) will receive your route, as soon as you load it for monitoring. If the route geography is outside an area that is predefined by WNS, WNS will suppress that route.
